TaiG is the latest **jailbreak for iOS 8.1.1, iOS 8.1.2** and iOS 8.2 beta including 8.0 and other later versions, which has been released by TaiG team. TaiG jailbreak tool is actually released by renowned jailbreak team and is now at the level where normal level of people like you can download and jailbreak their device. TaiG is already updated with all bug fixes and now users can **jailbreak iOS 8.0 to 8.1.2 Untethered** using the latest version from below download links.

Compatibility with other devices: Yes you can also use below tutorial to jailbreak iOS for other devices like iPad Air 2, Air, 4, 3, 2, Mini and iPod Touch 5G.

Download TaiG Jailbreak Tool for iPhone 6 Plus, 6, 5s, 5c, 5, 4s

The TaiG jailbreak is available for Windows users and can be downloaded TaiG v1.0 from below link:

TaiG 1.2.0 (English) (Windows): [TaiGJBreak_EN_1201.zip](#) [\[Mirror 1\]](#)

TaiG 1.2.0 (Chinese) (Windows): [TaiGJBreak_1201.zip](#) [\[Mirror 1\]](#)

How To TaiG Jailbreak iOS 8.1.2 Untethered Using TaiG

We recommend you to take a backup of your iPhone before proceeding with TaiG Jailbreak although the jailbreaking steps are very simple.

Step 1: Disable the passcode by going to Settings => Touch ID & Passcode and tap turning passcode off.

Step 2: Download TaiG latest version from above given **taig download links** or check our dedicated page for [TaiG Download](#).

Step 3: Unzip the file and Run the TaiGJBreak_EN_1201.exe file. If your device is not connected or is not compatible to **jailbreak with TaiG** you will see below screen.

Step 4: Connect your device and on the TaiG Screen you will see the status of your device and if it is jailbreakable with TaiG Jailbreak or not. If Find My iPhone is on turn it off by going to Settings => iCloud => Find My iPhone , Enter your AppleID & Password and Turn Off this settings. Refer to Below Image.

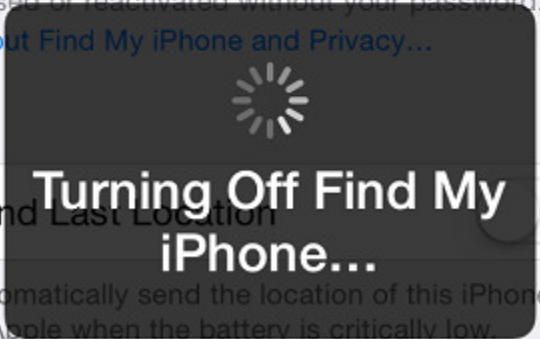

< iCloud Find My iPhone

Find My iPhone

Find My iPhone allows you to locate, lock, or erase your iPhone and prevents it from being erased or reactivated without your password. [About Find My iPhone and Privacy...](#)

Send Last Location

Automatically send the location of this iPhone to Apple when the battery is critically low.

 Please follow the instructions

 Please turn off "Find my iPhone" 
Turn off via: Settings > iCloud > click "Find My iPhone" > enter your AppleID password > Turn Off

After turning off the find my iPhone click Recheck to let the process continue. If everything is OK you will see below screen, you will see your iPhone model and iOS version and another reminder that turn off Find My iPhone function. Keep both check boxes checked as per the default settings on the TaiG Jailbreak Window.

Step 5: Finally click the Jailbreak button on the screen and let the process complete. At this stage you will see the progress of iOS 8.1.1 taig jailbreak in percentage as shown below.

Taig 8.1.2 Jailbreak Process will take few minutes and meanwhile when TaiG screen is showing 60% progress iPhone will reboot. If at this stage your Passcode lock is active program will ask to disable that, after you finish the settings wait for a minute and reboot will be completed again. If you are lucky you will receive a message on Taig screen that **iOS 8.1.2 TaiG jailbreak** is completed, after which you will be able to see Cydia icon on your springboard.

TaiG Jailbreak Fail Errors

If you receive the TaiG jailbreak fail error (-1004) don't worry just try again and if still problem persists you may try again by restoring your iPhone via iTunes.

How To Handle Taig Jailbreak Errors

Suggestions after several failed attempts for TaiG Jailbreak

- Please switch to the airplane mode, try again.
- Please reboot both your iOS devices as well as your computer, and try again.
- Please use the restore functionality in Pangu to restore your device, and try again.

If your [jailbroken iPhone](#) device reboots and you don't see *TaiG Jailbreak* Fail Error your jailbreak is complete. Just run Cydia and wait for initial file loading, after some time now you can install **Cydia Apps and Tweaks** as you wish.

Below is the list of TaiG Jailbreak Errors

-1001 device is disconnected

This TaiG error occurs if the link between the iPhone under TaiG jailbreak process and computer is disconnected, which can be caused by loose connection of lightning cable on any side. Try to reconnect the device. This problem may occur due to use of non genuine accessories i.e. cables. We recommend using genuine Apple parts data lines, some times data lines appear disconnected to prevent piracy problems.

-1002 Device passcode lock is on

If you saw this code, it means you have not disabled your passcode lock Please turn off passcode via: Settings – Passcode – Turn Passcode Off.

-1003 Program data damaged

Please Re-download TaiG Jailbreak Tool from official website , or change to stable Network Environment.

-1004 Jailbreak fail

This problem is caused by your computer. Please change to another computer and try again.

-1005 You have not disabled Find my iPhone

Please disable it via: Seetings - iCloud - Find My iPhone

-1006 Device Jailbroke

Your device is already having TaiG Jailbreak, please do not try it again or restore your iPhone.

-1007 Device not activated

Please activate your device before starting TaiG Jailbreak.
